ABOUT THE QUESTIONS OR REQUIREMENTS

1. Do I need to do all the requirements/questions of the test?
⇒Please ask questions if you do not understand

2. Do I need to make "responsive"?
⇒It is outside the scope of the test, but will add points to the evaluation if it is addressed

3. There is a requirement about API in the test, where can I get API's information?
⇒Please assume that the API will be created in the future

4. With navigation, do I need to make each menu navigate to a specific page or only

make an interface?
⇒Only interface please

5. How to download the "Hiragino Kaku Gothic Pro" font?
    ⇒https://www.screen.co.jp/ga_product/sento/downloads.html

6. There is a diagram on Top Page and Page My Record, do I need to use "library" to draw or is it a picture file?
    ⇒Please make a graph
      This is also an evaluation point.

7. Requirements have login logic. But I can't see the login page or the login logic. So, do we have any logic functions?
    ⇒It's out of scope, but I'll add points to the rating once it's created

8. If you have login logic, please send me the requirements.
    ⇒There is no particular specification, if you create it please leave it in the document

9. About design, are there 3 pages corresponding to 3 menus?
    ⇒yes

10. In order to finish 100% of the test, do I need to complete the UI and function of the Top page, My Record, Column page?
    ⇒If possible, it is so, but if it is difficult, please tell us how far you have been able to do it, and we will evaluate it up to that point.

11. Do I need to create a "fake server" to implement an operation function with API or just create a dummy date?
    ⇒yes
      Create dummy data such as mock for test data

12. Is there other method to access collumn page instead of using コラム一覧 item?
    ⇒does not exist

13. In the beginning of the test, is the data is hard code data and does not have an API?
    ⇒Create dummy data such as mock for test data

14. Can I use any UI libraries?
    ⇒yes
